WHY CHOOSE US?

We are a non-profit football academy with a mission to mentor and educate the next generation of great Bhutanese leaders.

Our boys are moving on to exciting opportunities in professional football, full university scholarships, and local jobs. It would be amazing if one of our players became the next great soccer star, but our real hope is that through their mentorship and education, they will become great fathers, community leaders, and role models.

OUR ACADEMY

Our Academy is dedicated to developing football in Bhutan and the youth that engage in this beautiful game. Our aim is to remove the emphasis from winning and focus on long term development of players. By celebrating spirit, sportsmanship, skill and good character, our youth have an opportunity to realize their full potential as a responsible member of society and as a football player. We strive to develop children who are independent, value learning, are creative and enjoy playing football as part of a team.

As one of the earliest training providers in Bhutan, we deliver diverse football programs and clinics, which are fun, inspirational and educational. These programs are age and ability appropriate for male or female players and are founded on the principles of safety, learning and enjoyment.
